MOHMMAD SUFIAN

AI Engineer | Generative AI | Agentic AI | RAG | LangGraph | Python

+91 6200126662 | khansyrian1@gmail.com | linkedin.com/in/mohammad-sufian-08077a2b8 | github.com/sufian-01 | sufian-01.vercel.app

PROFESSIONAL SUMMARY

AI Engineer with hands-on experience building LLM-powered applications, Retrieval-Augmented Generation (RAG) systems, and agentic AI workflows using Python, LangChain, LangGraph, and FastAPI. Currently working as an AI Engineer Intern at Multiply Tech India Private Limited, developing Agentic Process Automation (APA) pipelines and integrating generative AI into product workflows. Skilled in prompt engineering, semantic search, embeddings, vector databases, tool calling, human-in-the-loop design, and model evaluation, with a track record of taking AI solutions from prototype to deployment through backend APIs and automation systems.

TECHNICAL SKILLS

Programming & Backend: Python, SQL, FastAPI, REST API Development, Webhook Integration, Async Programming, Pydantic, JSON Handling
Generative AI & LLMs: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Agentic AI, Agentic Process Automation (APA), LangChain, LangGraph, Prompt Engineering, Tool / Function Calling, Human-in-the-Loop (HITL), Semantic Search, Embeddings, LLM Workflows, Model Fine-Tuning & Evaluation
LLM APIs & Platforms: Google Gemini API, OpenAI API, Anthropic API, Hugging Face, Transformers
Vector Databases & Storage: FAISS, ChromaDB, SQLite, MySQL
Libraries & Frameworks: Pandas, NumPy, Streamlit, Requests, BeautifulSoup, PyPDF, youtube-transcript-api, python-dotenv
Tools & Integrations: Git, GitHub, Docker, Postman, VS Code, Jupyter Notebook, Gmail API, Google Calendar API, Google Sheets API, Telegram Bot API, WhatsApp Automation

PROFESSIONAL EXPERIENCE

AI Engineer Intern | *Multiply Tech India Private Limited, Noida, India (On-site)* **Aug 2026 – Present**

- Design, develop, and deploy AI/ML models and agentic pipelines for real-world business use cases.
- Build and maintain Agentic Process Automation (APA) workflows using LangGraph and FastAPI.
- Work with LLMs, LangGraph, and generative AI tools to build intelligent, goal-oriented product features.
- Integrate AI capabilities into existing product workflows and WhatsApp-based automation systems.

Freelance AI & Python Developer | *Self-Employed (Remote)* **Jan 2024 – Present**

- Developed AI automation solutions using Python and LLM frameworks for client projects.
- Built RAG chatbots and AI-powered web applications with API integrations.

Technical Lead | *NSDC Community, Jamia Hamdard University* **2025 – 2026**

- Led technical initiatives and coordinated student development projects; supervised project planning.

FEATURED PROJECTS

Multi-Agent Scheduling Assistant (Agentic AI) | *Python, LangGraph, LangChain, FastAPI, Streamlit, FAISS, Gemini*

- Built a multi-agent AI assistant for meeting scheduling, email automation, and PDF RAG document Q&A.;

AI Telegram Secretary (Agentic AI) | *Python, FastAPI, LangGraph, Gemini 2.5 Flash, SQLite, Google Workspace APIs*

- Created agentic workflow with SQLite memory automating Gmail, Calendar, and Sheets via multi-tool calling.

AI Stock Market Assistant with Human-in-the-Loop (HITL) | *Python, LangGraph, OpenAI GPT, MemorySaver*

- Implemented HITL approval interrupts for sensitive trade simulation with thread persistence.

YouTube RAG Assistant | *Python, LangChain, Hugging Face, FAISS, Gemini 2.5 Flash, Streamlit*

- Designed end-to-end RAG pipeline with transcript extraction, vector search, and context-aware Q&A.;

EDUCATION & CERTIFICATIONS

Bachelor of Technology (B.Tech) in Computer Science Engineering | Jamia Hamdard University (2023 – 2027, Final Year)

- Full Stack Generative and Agentic AI with Python – Udemy (2026)
- Python Programming Internship – Tamizhan Skills (2025)
- Certificate in Computer Applications (CABA–MDTP) – NIELIT & NCPUL (2022)
